# **Understanding Your Annual Performance Report (APR)**

2008-2009

2008 4<sup>th</sup> Cycle APR

## **Version 7**

**Updated 10/23/2008** 

A guide to the sources and calculations used in developing your APR

#### TABLE OF CONTENTS

SCORING GUIDE MEASURES	1
STANDARD 9.1 INDICATORS 1, 2, 3, 4, 5 AND 6 (MAP)	3
GAP BONUS POINTS	7
MINORITY CALCULATION	7
FREE AND REDUCED-PRICE LUNCH CALCULATION	8
BONUS ACHIEVEMENT STANDARD	9
_ACT CALCULATION (9.3)	10
ADVANCED COURSES CALCULATION (9.4.1)	11
CAREER EDUCATION COURSES CALCULATION (9.4.2)	14
ADVANCED AND CAREER EDUCATION COURSES CALCULATION (9.4.1 AND 9.4.2)	16
COLLEGE PLACEMENT CALCULATION (9.4.3)	18
CAREER EDUCATION PLACEMENT CALCULATION (9.4.4)	19
COLLEGE AND CAREER EDUCATION PLACEMENT CALCULATION (9.4.3 AND 9.4.4 COMBINED)	21
GRADUATION RATE CALCULATION (9.5)	23
ATTENDANCE CALCULATION (9.6)	25
SUBGROUP ACHIEVEMENT CALCULATION (9.7)	27
POST-ELEMENTARY SCHOOL GPA CALCULATION (K-8 DISTRICTS ONLY) (10.1)	28
SCORING GUIDES	30
VOLUNTARY SUBJECT AREA BONUS POINTS - SCIENCE	36
K-12 DISTRICT SUMMARY EXAMPLE	43
K-8 DISTRICT SUMMARY EXAMPLE	47
PROCEDURES FOR MAKING CORRECTIONS	50
NOTES	51

The Department of Elementary and Secondary Education does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs and activities. Inquiries related to Department programs may be directed to the Title IX Coordinator, Jefferson State Office Building, 5<sup>th</sup> Floor, 205 Jefferson Street, Jefferson City, Missouri 65102-0480; telephone number 573-751-4212. For questions about the Annual Performance Report, please contact 573-526-4886.

#### SCORING GUIDE MEASURES

During the 4<sup>th</sup> MSIP Cycle, performance determines the accreditation level of a school district. Performance standards will be evaluated using status and progress measures to determine if a standard is met.

Status and progress points are combined to determine if a standard is met, unless no progress points are possible. Progress points toward meeting a standard are earned for the method awarding the maximum number of points for the district.

The detailed scoring guides for each performance standard are outlined in the section titled "SCORING GUIDES".

#### **STATUS MEASURES**

Status measures the district's level of achievement based upon a five year average of performance data, unless five years of data are not available. Status is divided into five levels as follows:

**High 1** - 1 standard deviation above the mean for the state

**High 2** – 1/3 of 1 standard deviation above the mean for the state

**Average** – Mean for the state

**Below Average** -1/3 of 1 standard deviation below the mean for the state

**Floor** – 1 standard deviation below the mean for the state

**Note:** The status levels for the Attendance and Career Education Course standards were established at 1/3 of 1 standard deviation below the levels cited above. The status levels for grade level MAP assessments were lowered in 2007 by .175 from the 2006 levels.

#### **PROGRESS MEASURES**

Progress measures the district's improvement over a five-year period. Progress is measured in the following ways:

**Annual** – This method measures improvement from year to year.

**Rolling Average** – This method measures improvement by comparing two-year averages. Years 1 and 2 are averaged, years 2 and 3 are averaged, years 3 and 4 are averaged, and years 4 and 5 are averaged; these averages are then compared to determine the amount of improvement.

#### **Example:**

Grades 3-5 Math	Year 1	Year 2	Year 3	Year 4	Year 5
Index Score	195.6	192.1	196.8	209.6	213.9

For the above scores, the rolling average would be calculated as follows:

> STEP 1 – Add the score for each year to the score for the following year.

Years 1 and 2: 195.6 + 192.1 = 387.7 Years 2 and 3: 192.1 + 196.8 = 388.9 Years 3 and 4: 196.8 + 209.6 = 406.4 Years 4 and 5: 209.6 + 213.9 = 423.5 > STEP 2 – Divide each of the preceding sums by 2 to determine the two-year average.

Years 1 and 2:  $387.7 \div 2 = 193.85$ Years 2 and 3:  $388.9 \div 2 = 194.45$ Years 3 and 4:  $406.4 \div 2 = 203.2$ Years 4 and 5:  $423.5 \div 2 = 211.75$ 

➤ <u>STEP 3</u> – Compare the two-year averages to determine the number of scoring points earned using the rolling average method.

Grades 3-5 Math	Yr 1-Yr 2	Yr 2-Yr 3	Yr 3-Yr 4	Yr 4-Yr 5
	Average	Average	Average	Average
Two-Year Average	193.85	194.45	203.2	211.75

For math, a district earns 6 progress points for each increase of 2 index points or more on the rolling average. In this example, the index score increases by .6 from the first to the second comparison, by 8.75 from the second to the third comparison, and by 8.55 from the third to the fourth comparison. A district with these scores would earn 12 progress points using the rolling average method.

**3 over 2** - This method measures improvement by comparing the average of the latest 3 years of data with the average of the first two years of data.

#### Example:

Grades 3-5 Math	Year 1	Year 2	Year 3	Year 4	Year 5
Index Score	195.6	192.1	196.8	209.6	213.9

For the above scores, the 3 over 2 method would be calculated as follows:

> STEP 1 – Add the score for the first two years of data and the latest 3 years of data.

**Years 1 and 2:** 195.6 + 192.1 = 387.7

**Years 3, 4 and 5:** 196.8 + 209.6 + 213.9 = 620.3

➤ <u>STEP 2</u> – Divide preceding sums for years 1 and 2 by 2 and the sum for years 3, 4, and 5 by 3 to determine the average.

**Years 1 and 2:**  $387.7 \div 2 = 193.85$ 

**Years 3, 4 and 5:**  $620.3 \div 3 = 206.8$ 

➤ <u>STEP 3</u> – Compare the two-year average and the three-year average to determine the number of scoring guide points earned using the 3 over 2 method.

Grades 3-5 Math	Yr 1-2 Average	Yr 3, 4, & 5 Average
Average Index Scores	193.85	206.8

For math, a district earns 12 progress points for an increase of 6 index points or more on the 3 over 2 method. In this example, the index score increases by 12.95 index points. A district with this score would earn 12 progress points using the 3 over 2 method.

## Standard 9.1 Indicators 1, 2, 3, 4, 5 and 6 (MAP)

Source of data used in calculation: Data are obtained from CTB McGraw-Hill, which is the contracted, testing publisher for the Missouri Assessment Program and from the Assessment Resource Center (ARC), which is the contracted testing publisher for the Missouri Assessment Program-Alternate (MAP-A). Thesedata files are used to create online reports for district use.

#### **Notes:**

- If the MAP testing schedule is reconfigured, the MAP scoring guidelines may be redesigned to maintain the continuity of MAP measurement for MSIP purposes.
- All MAP performance data are reported to the nearest tenth.
- *MAP data for K-8 districts include only two grade spans (3-5 and 6-8).*

#### **MEASURING MAP**

The MAP Performance Index (MPI) is used to evaluate MAP performance. The index approach calculates the movement of students throughout all MAP achievement levels. Data are analyzed by grade span (3-5, 6-8, and 9-11) for each subject area using status and progress measures. During the fourth cycle of MSIP, more than five years of test data will be analyzed to account for implementation of the state's new assessment system beginning in 2006. Throughout the cycle, the weight of the test data will gradually shift from the majority of the points being awarded for the grade span test data in the beginning of the cycle, to the majority of the points being awarded for the grade level test data by the end of the cycle.

The status and progress methods are applied to each subject in each grade span. The method awarding the maximum total points from status (High 1, High 2, Average, Below Average, and Floor) and from progress (Annual, Rolling Average, and 3 over 2) is used for each subject area. The subject area/grade span standard is considered "met" if the grade level and grade span test data combined total 40 status points or 50 status plus progress points or 40 status plus progress points and the bonus gap is met.

#### **Exclusions**

Scores for ELL students who have been in the United States three years or less are disaggregated if the district codes a student as "ELL less than 3 years in the U.S.A" and/or "ELL less than 1 year in the U.S.A." on the MOSIS April Student Core Submission.

#### **Grade Span Data**

From the inception of the MAP through the 2004-2005 school year, the MAP assessments were administered to students for each subject area one time in each grade span (3-5), (6-8), and (9-11). These tests are **grade span assessments**. For MSIP purposes, the Mathematics and Communication Arts 2001-2005 grade span assessment data will be measured throughout fourth cycle. These grade span assessments measure student achievement based upon five achievement levels: (Step 1, Progressing, Nearing Proficient, Proficient, and Advanced). The MPI calculation for the grade span assessment data is described on the next page.

#### **Grade Level Data**

Beginning with the 2005-2006 school year, the Mathematics and Communication Arts MAP assessments are administered to students each year in grades 3-8. Mathematics MAP assessments are administered in grade 10 and Communication Arts assessments are administered in grade 11. These tests are **grade level assessments**. For MSIP purposes, the Mathematics and Communication Arts grade level test data will be measured beginning with the 2006 school year. These grade level assessments measure student achievement based upon four achievement levels: (Below Basic, Basic, Proficient, and Advanced.) The MPI calculation for the grade level assessment data is described on the next page.

#### **Comparing Grade Span Data with Grade Level Data**

Districts **should not** try to make comparisons between the grade level test data and prior grade span test data using the MPI or percent proficient. The grade level tests are new tests that were developed with different cut scores for proficiency and with only four achievement levels compared with five.

#### **Science and Social Studies Data**

During the 2002-2003, 2003-2004, 2004-2005, 2005-2006, and 2006-2007 school years, social studies and science assessments were not state-funded. Districts were allowed to choose whether or not to use local funds to administer one or both of these assessments. In 2007-2008 Science assessments became mandatory for grades 5, 8, and 11. A bonus point for science can be earned in 2008. Please see the section title Subject Area Bonus Points for more information.

#### MAP PERFORMANCE INDEX (MPI)

For each subject in each grade span, MSIP uses the index approach to compare improvement on the MAP. The index approach is based on a composite of the performance of all students across all MAP achievement levels. The assessment results in each subject tested for each year are converted to index points, and these index points are used to measure improvement from year to year.

#### MPI CALCULATION

The index is a single composite number that represents the performance of every student in all MAP levels in a tested subject for a defined grade span. Index points are calculated by first multiplying the percent of reportable students scoring in each achievement level for each subject and grade span by the values described below.

#### **MPI Values for Grade Span Data (2001-2005)**

Multiply the percent Advanced by 3, percent Proficient by 2.5, percent Nearing Proficient by 2, percent Progressing by 1.5, and percent Step 1 by 1. These products are then summed to produce the MPI which ranges from 100-300. (See the Grade Span MPI Example Calculation below.)

#### **MPI Values for Grade Level Data (2006-2008)**

Grade level assessments are measured by defined grade spans (3-5, 6-8, and 9-11). The grade span MPI for the grade level assessments is determined by calculating the percent of students in each achievement level for all grades within a span. For example, the total number of reportable students in each achievement level in grades 3, 4, and 5 is divided by the total number of accountable students in grades 3, 4, and 5 to determine the percent of reportable students in each achievement level. Multiply the percent Advanced by 9, percent Proficient by 8, percent Basic by 7, and percent Below Basic by 6. These products are then summed to produce the MPI which ranges from 600-900. (See the Grade Level MPI Example Calculation on the next page.)

#### **MPI Example Calculation - Grade Span Data**

The following example shows how the index is calculated in a single subject and grade span:

> <u>STEP 1</u> – The percent of students in each performance level is determined for each year.

Level	<b>Index Point Value</b>	Year 1	Year 2	Year 3	Year 4	Year 5
Step 1	1.0	19.5%	20.2%	17.0%	16.9%	9.6%
Progressing	1.5	21.3%	20.5%	21.3%	14.0 %	20.0%
Nearing Proficient	2.0	27.0%	27.6%	28.0%	24.6%	25.4%
Proficient	2.5	12.9%	18.4%	18.5%	22.1%	23.0%
Advanced	3.0	19.3%	13.3%	15.2%	22.4%	22.0%

> <u>STEP 2</u> – The percentage of students in each performance level is multiplied by the index point value for each year.

Year 1	Year 2	Year 3	Year 4	Year 5
19.5 x 1.0 = 19.50	$20.2 \times 1.0 = 20.20$	$17.0 \times 1.0 = 17.00$	16.9 x 1.0 = 16.90	$9.6 \times 1.0 = 9.60$
21.3 x 1.5 = 31.95	$20.5 \times 1.5 = 30.75$	21.3 x 1.5 = 31.95	$14.0 \times 1.5 = 21.00$	$20.0 \times 1.5 = 30.00$
$27.0 \times 2.0 = 54.00$	$27.6 \times 2.0 = 55.20$	$28.0 \times 2.0 = 56.00$	$24.6 \times 2.0 = 49.20$	$25.4 \times 2.0 = 50.80$
$12.9 \times 2.5 = 32.25$	$18.4 \times 2.5 = 46.00$	$18.5 \times 2.5 = 46.25$	22.1 x 2.5 = 55.25	$23.0 \times 2.5 = 57.50$
19.3 x 3.0 = 57.90	13.3 x 3.0 = 39.90	$15.2 \times 3.0 = 45.60$	22.4 x 3.0 = 67.20	22.0 x 3.0 = 66.00
195.6 Index Points	192.1 Index Points	196.8 Index Points	209.6 Index Points	213.9 Index Points

> <u>STEP 3</u> - For scoring in each grade span, a grid is created and scoring guidelines are applied to the scores in the grid. An example appears in the grid below:

	Year 1	Year 2	Year 3	Year 4	Year 5	Status
Grades 3-5 Math	195.6	192.1	196.8	209.6	213.9	201.6

> <u>STEP 4</u> – Status is determined by adding the MPI of year 1, year 2, year 3, year 4, and year 5 and dividing by 5.

#### **MPI Example Calculation - Grade Level Data**

The following example shows how the index is calculated in a single subject and grade levels:

> <u>STEP 1</u> – The percent of students in each performance level is determined for each year. The total reportable for an achievement level is divided by the total accountable for the applicable grade level to obtain the percent reportable.

Achievement	Grade 3	Grade 4	Grade 5		Grades 3-5	Grades 3-5	Grades 3-5
Level	Number	Number	Number		Total	Total	Percent
	Reportable	Reportable	Reportable		Reportable	Accountable	Reportable
Below Basic	10	15	20	11	45	130	34.6%
Basic	15	15	10		40	130	30.8%
Proficient	5	10	15	=	30	130	23.1%
Advanced	5	5	5	11	15	130	11.5%
		To	tal Accountable	=	130		

> <u>STEP 2</u> – The percentage of students in each performance level is multiplied by the index point value for each year.

Achievement	Index Point Value	Percent	MPI
Level		Reportable	
Below Basic	6	34.6%	$34.6 \times 6 = 207.60$
Basic	7	30.8%	$30.8 \times 7 = 215.60$
Proficient	8	23.1%	$23.1 \times 8 = 184.80$
Advanced	9	11.5%	$11.5 \times 9 = 103.50$
			711.5 Index Points

The sum of each of these products for each subject tested is the index for that subject. The index measures improvement from one year to the next for each subject. The scoring guide defines the required improvement in index score from one year to the next.

> <u>STEP 3</u> - For scoring in each grade level, a grid is created and scoring guidelines are applied to the scores in the grid. An example appears in the grid below:

GRADE LEVEL	Year 1	Year 2	Year 3	Year 4	Year 5	Status
Grades 3-5 Mathematics	711.5	725	735			723.8

➤ <u>STEP 4</u> – Status is determined by adding the Grade Level MPI of year 1, year 2, year 3, year 4, and year 5 and dividing by the number of years.

#### LEVEL NOT DETERMINED (LND)

This is the percent of students for which the district is accountable who do not receive a valid MAP score in a subject area. Districts may not earn points toward meeting a MAP performance standard when the maximum percent of students in LND is exceeded. The MSIP LND criteria for the 2001-2005 data (grade span test data) and the 2006-2008 data (grade level test data) are described below.

#### LND Criteria 2001-2005 data (grade span test data)

No points are awarded for grade span test data if the average LND in that subject area over the years analyzed exceeds 10%. If the LND in one or more years exceeds 14%, the average LND must be 10% or less **and** the LND in the final year of analysis must be 6% or less in order to earn scoring guide points. If grade span test data is not scored due to the LND percentage, the # symbol appears next to the subject area on the APR summary sheet.

#### LND Criteria 2006-2008 data (grade level test data)

No points are awarded for grade level test data if the LND is greater than 5% in the final year of analysis or if the average LND is greater than 5%. If grade level test data are not evaluated due to the LND percentage, the # symbol appears next to the subject area on the APR summary sheet.

#### **LND and MAP-A Students**

Students who take the MAP-A are included in the LND for years 2001-2003; however, beginning in 2004-2005, MAP-A students with a scorable MAP-A portfolio in a grade level tested on the MAP will be assigned an achievement level.

#### LND and ELL Students

Scores for ELL students who have been in the United States three years or less are disaggregated if the district codes a student as "ELL less than 3 years in the U.S.A" and/or "ELL less than 1 year in the U.S.A." on the MOSIS April Student Core Submission.

#### **LND Calculation Example:**

#### **Annual LND**

- 1. "Accountable Students" minus "Reportable Students" equals "LND Students"
- 2. "LND Students" divided by "Accountable Students" equals "Annual Percent of Students in LND"

#### **Average LND**

1. Sum of Annual Percent of Students in LND for all required years divided by the number of required years

	Year 1	Year 2	Year 3	Year 4	Year 5	Average LND
Accountable	50	45	52	60	50	
Reportable	45	40	49	58	49	
LND Students	5	5	3	2	1	
Percent of Students in LND	10.0%	11.1%	5.8%	3.3%	2.0%	6.4%

#### **GAP BONUS POINTS**

Districts have the opportunity to earn bonus credit toward meeting each MAP standard, using either a comparison of the MAP improvement of their minority population or their free and reduced-price lunch population with the state majority. If either of the following conditions is considered "Met", the district may meet the MAP standard IF the district has earned at least 40 Status + Progress points.

#### **Minority Comparison**

The MAP scores of minority groups that include 20 or more students are aggregated to create an MPI for the minority population. The MAP improvement of the district's minority population from 2007 to 2008 is compared with that of the improvement of the state majority from 2007 to 2008. The bonus provision is considered "Met" if the improvement of the district's minority population is greater than the improvement of the state majority. The Gap Bonus "Met" alone does not mean the MAP standard is "Met". In addition, the district still has to earn at least 40 Status + Progress points in order to meet the MAP standard.

#### **Minority Calculation:**

The district's data are examined to determine the minority groups (Hispanic, Black (not Hispanic), Asian/Pacific Islander, American Indian/Alaskan Native) in which 20 or more students were assessed in each grade span in 2007 and 2008. The data for those groups are aggregated to create a single MPI for comparison purposes. (See the MPI Grade Level Calculation, Steps 1-3 above to determine how to calculate the MPI.) The minority MPI for 2007 is compared with the minority MPI for 2008 to determine improvement. An MPI is calculated for the state majority group for 2007 and 2008 for comparison purposes. The 2007 MPI for the state majority is compared with the 2008 MPI for the state majority to determine improvement. If the district's minority population improved more than the state majority, the district meets the Gap Bonus provision.

#### Free and Reduced-Price Lunch Comparison

If the district's free and-reduced lunch population includes 20 or more students, the MPI improvement of those students from 2007 to 2008 is compared with the improvement of the state non-free and reduced-price lunch population. The bonus provision is considered "Met" if the improvement of the district's free and reduced-price lunch population is greater than the improvement of the state non-free and reduced-price lunch population. The Gap Bonus "Met" alone does not mean the MAP standard is "Met". In addition, the district still has to earn at least 40 Status + Progress points in order to meet the MAP standard.

#### Free and Reduced-Price Lunch Calculation:

The district's data are examined to determine if 20 or more free and reduced-price lunch students were assessed in each grade span in 2007 and 2008. The data for those groups are aggregated to create a single MPI for comparison purposes. (See the MPI Grade Level Calculation, Steps 1-3 above to determine how to calculate the MPI.) The free and reduced-price lunch MPI for 2007 is compared with the free and reduced-price lunch MPI for 2008 to determine improvement. An MPI is calculated for the state non-free and reduced-price lunch group for 2007 and 2008 for comparison purposes. The 2007 MPI for the state non-free and reduced-price lunch group is compared with the 2008 MPI for the state non-free and reduced-price lunch group to determine improvement. If the district's free and reduced-price lunch population improved more than the state non-free and reduced-price lunch group, the district meets the Gap Bonus provision.

#### **EXAMPLE:**

Missouri Assessment Program	2007	2008	Improvement
GAP BONUS			
9.1*1 Grades 3-5 Mathematics			
District Minority	717.0	720.0	3.0
State Majority	756.0	760	4.0
District Free- & Reduced-Price Lunch	720.0	735.0	15.0
State Non-Free- & Reduced-Price Lunch	764.2	768.4	4.2

In this example, the district's minority population did not improve as much as the state majority, so no Gap Bonus credit was awarded for the minority population. The district's free and reduced-price lunch population improved more than the state's non-free and reduced-price lunch population so Gap Bonus credit was awarded.

### BONUS ACHIEVEMENT STANDARD

Districts have the opportunity to meet an additional performance standard if any improvement is demonstrated in the MPI from 2007 to 2008 in a majority of the MAP standards (9.1\*1-9.1\*6). K-12 school districts must demonstrate improvement in the MPI from 2007 to 2008 in four out of six performance standards. K-8 school districts must demonstrate improvement in the MPI from 2007 to 2008 in three out of four performance standards.

#### **EXAMPLE:**

Missouri Assessment Program GRADE LEVEL	2007	2008	Improvement
9.1*1 Grades 3-5 Mathematics	730.0	731.0	Yes
9.1*2 Grades 3-5 Communication Arts	707.3	704.6	No
9.1*3 Grades 6-8 Mathematics	786.0	786.1	Yes
9.1*4 Grades 6-8 Communication Arts	775.0	785.0	Yes
9.1*5 Grades 9-11 Mathematics	664.0	664.4	Yes
9.1*6 Grades 9-11 Communication Arts	700.0	691.3	No

Missouri Assessment Program	2007	2008
BONUS GRADE LEVEL ACHIEVEMENT		
Number of MAP Standards Evaluated	6	6
Number Demonstrating Improvement		4
Percent of MAP Standards Improved		66%

<sup>\*\*</sup>Bonus Achievement Standard is Met at 66%.

## Standard 9.3 ACT Calculation

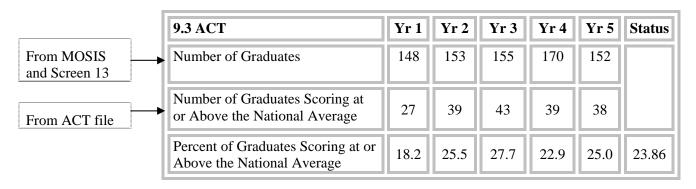

#### Sources of data used in calculation:

- June Cycle of Core Data, Screen 13 (2004-2008)
  - Includes aggregated student-level data from MOSIS June Cycle certified files
- ACT File

#### **NOTES:**

- Only scale score data as reported by ACT will be used in these calculations.
- When students take the ACT multiple times, the highest test score is used to determine the number of graduates scoring at or above the national average.

#### **Example of supporting data format for APR:**

#### Method for calculating supporting data:

The percent of graduates scoring at or above the national average is determined by dividing the number of graduates scoring at or above the national average by the number of graduates, then multiplying by 100.

EXPLANATION OF DATA	EXAMPLES OF DATA	EXAMPLES OF
	(using Yr 1-Yr 5 figures)	CALCULATIONS
1) The <b>number of graduates</b> is reported on	number of graduates = 148	
Screen 13.		
2) The number of graduates scoring at or	number of graduates	
<b>above the national average</b> is provided by	scoring at or above the	
ACT.	national average = 27	
3) The percent of graduates scoring at or	a) number of graduates =	% of graduates scoring at or
above the national average is determined by	148	above the national average =
dividing the number of graduates scoring at	b) number of graduates	
or above the national average by the	scoring at or above the	$27 \div 148 = .182$
number of graduates, then multiplying by	national average = 27	
100.		$.182 \times 100 = 18.2\%$
4) <b>Status</b> is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3 + Yr4 +	18.2 + 25.5 + 27.7 + 22.9 +
Yr3, Yr4, and Yr5 of the <b>percent of</b>	Yr 5 = 119.30	25.0 = 119.30
graduates scoring at or above the national		
<b>average</b> and dividing by 5.		$119.30 \div 5 = 23.86\%$

For more information on the ACT or to obtain the national average, visit the ACT website at <a href="www.act.org">www.act.org</a>.

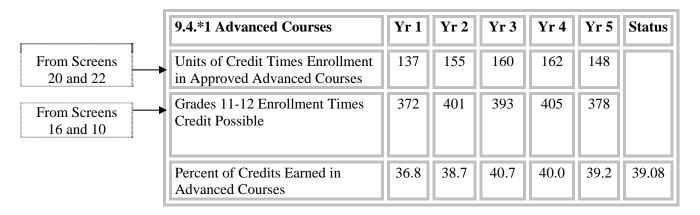

## Standard 9.4 Advanced Courses Calculation (9.4.1)

#### Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10

**NOTE:** In addition to the advanced courses provided within the resident district, advanced courses provided off site are automatically included in the calculation for 9.4.1 if the district submits the required data (including course numbers) to populate Core Data Screen 22. Screen 22 data must be reported for each area institution that provides advanced courses (i.e., other districts, community colleges, four-year colleges and universities, and Internet/electronic instructional providers). Only those specific courses with course codes and grade levels matching those on the approved advanced course list, courses coded with a delivery system of IB or AP, and dual credit courses (excluding career education dual-credit classes) count in the advanced course calculation.

#### **Example of supporting data format for APR:**

#### Method for calculating supporting data:

The percent of credits earned in advanced courses is determined by dividing the units of credit times enrollment in approved advanced courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

EXPLANATION OF CALCULATIONS	EXAM	EXAMPLES OF DATA		EXAMPLES OF
	(using Y	ear 1 figu	ires from	CALCULATIONS
	above)			
1) Units of credit times enrollment in	ADVANC	ADVANCED		
approved advanced courses is determined	Course #	Credit	<u>Enroll</u>	Adv. Course Units Earned
by using the courses reported on Screen 20	054810	1	18	1 X 18 = 18
that match the advanced course criteria (i.e.	056500	1	16	1 X 16 = 16
course number, sequence, and grade level	062000	.5	20	$.5 \times 20 = 10$
see below for a list of advanced courses) and	066300	1	17	1 X 17 = 17
non-career education dual-credit courses	115860	1	19	1 X 19 = 19
reported on Screen 22. The credit value of	991105	2	21	$+ 2 \times 21 = 42$
each course is multiplied by the course				122
enrollment, then these products are summed.				

	DUAL CREDIT (excluding	
	career education)	Dual Credit Units Earned
	Course # Credit Enroll	1 X 15 = 15
	115861 1 15	
		122 + 15 = 137 Total Units
		Earned
2) Grades 11-12 enrollment times credits	September enrollment for	
<b>possible</b> is determined by using the sum of	grades 11 and $12 = 62$	
the enrollment in grades 11 and 12 (using		
September count), which is reported on	Periods per day $= 6$	62 X 6 = 372
Screen 16. This total enrollment number is		
multiplied by the total number of periods per		
day, as reported on Screen 10. If the reported		
periods per day are less than 6, this indicates		
block scheduling. In this case, the enrollment		
is multiplied by total periods per day times 2.		
3) The percent of credits earned in	a) units of credit times	% of credits earned in
advanced courses is determined by dividing	enrollment in advanced	advanced courses =
units of credit times enrollment in	courses = 137	
advanced courses by grades 11-12	b) grades 11-12 enrollment	$137 \div 372 = .368$
enrollment times credits possible, then	times credits possible = 372	
multiplying by 100.		.368 X 100 = 36.8%
4) <b>Status</b> is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3 + Yr4 +	36.8 + 38.7 + 40.7 + 40.0 =
Yr3, Yr4, and Yr5 of the <b>percent of credits</b>	Yr 5 = 195.40	195.40
earned in advanced courses and dividing by		
5.		$195.40 \div 5 = 39.08\%$

### **List of Advanced Courses**

The following courses/course codes have been designated "Advanced Courses." These courses are considered advanced because they are over and above the courses required for graduation. It is assumed that the content of the courses, in general, is at a level suitable for juniors and seniors who are preparing for postsecondary education or training

<b>Course Code</b>	Course Name	Description
054800	Language Arts	Grade 11 or 12 and sequence 3 or greater
054804-5	Comp/Creative Writing	Grade 11 or 12
054806	Applied Comm.	Grade 11 or 12 and sequence 3 or greater
054810	Journalism	Grade 11 or 12 and sequence 2 or greater
054817	Folklore	Grade 11 or 12
054819-28	Literature, Various	Grade 11 or 12
054845	Shakespeare	Grade 11 or 12
054850	Mythology	Grade 11 or 12
054860	Word Study (Semantics)	Grade 11 or 12
054861	C. Prep English	Grade 11 or 12
054863	Satire-Humor	Grade 11 or 12
054864	Ethnic Literature	Grade 11 or 12
056500	Speech	Grade 11 or 12 and sequence 2 or greater

### **Career Education Courses Calculation (9.4.2)**

#### Sources of data used in calculation:

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10
- State-Approved Career Education Course List

**NOTE:** Career education courses reported on Screens 20 and 22 are compared with a list of the district's state approved career education courses. Only those career education courses verified by the Division of Career Education as state approved are counted for MSIP purposes. Dual-credit career education classes are included in this standard.

#### **Example of supporting data format for APR:**

#### Method for calculating supporting data:

The percent of credits earned in career education courses is determined by dividing the units of credit times enrollment in approved career education courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

EXPLANATION OF CALCULATIONS	EXA	MPLES (	OF DATA	EXAMPLES OF
	(using Year 1 figures from above)		es from above)	CALCULATIONS
1) The units of credit times enrollment in	CAREER	ED. (on	-site)	
approved career education courses is	Course #	Credit	<u>Enroll</u>	Car. Ed. Units Earned On-
determined by using data reported on	034354	1.5	17	site
Screen 20 to identify state-approved career	034380	1	13	$1.5 \times 17 = 25.5$
education courses, indicated by a program	040080	2	18	1 X 13 = 13
code "01" (see next page for exceptions).				$+2 \times 18 = 36$
Data from Screen 22 are used to identify				74.5
career education courses offered off-site	CAREER	ED. (off	-site)	
(i.e., at an area career education school or	Course #	Credit	Enroll	
college). The credit value of each course is	016720	1	15	Car. Ed. Units Earned Off-
multiplied by the course enrollment, then				<u>site</u>
the products are summed.				1 X 15 = 15
				74.5 + 15 = 89.5 Total Units
				Earned
2) Grades 11-12 enrollment times credits	Septembe	r enrollm	ent for grades	
<b>possible</b> is determined by using the sum of	1	1 and 12	= 62	62 X 6 = 372
the enrollment in grades 11 and 12 (using				

September count), which is reported on	Periods per day = 6	
Screen 16. This total is multiplied by the		
total number of periods per day, as reported		
on Screen 10. If the reported periods per		
day are less than 6, this indicates block		
scheduling. In this case, the enrollment is		
multiplied by total periods per day times 2.		
3) To determine <b>percent of credits earned</b>	a) units of credit times enrollment	% of credits earned in
in career education courses, the units of	in career education courses = 89.5	career education courses =
credit times enrollment in career	b) grades 11-12 enrollment times	$89.5 \div 372 = .241$
education courses are divided by grades	credits possible = 372	
11-12 enrollment times credits possible,		.241 X 100 = 24.1%
then multiplied by 100. *		
4) <b>Status</b> is determined by adding Yr1, Yr2,	a) $Yr1 + Yr2 + Yr3 + Yr4 + Yr5$	24.1 + 25.4 + 23.9 + 27.7 +
Yr3, Yr4, and Yr5 of the <b>percent of credits</b>	= 125.6	24.5 = 125.6
earned in career education courses and		
dividing by 5.		$125.6 \div 5 = 25.12\%$

<sup>\*</sup>Career education comprehensive high schools include 9-12 enrollment.

### **Career Education Courses Exceptions**

All state-approved career education courses are used in the evaluation of MSIP Performance Standard 9.4.2 **except for the following:** 

Course Code	Course Name
016700	Exploring Agriculture
016710	Agricultural Science 1
016760	Agricultural Science 2
096800	Exploratory Family and Consumer Sciences

Note: Please contact the Division of Career Education (573/751-3872) if you have questions regarding the approval of a career education program.

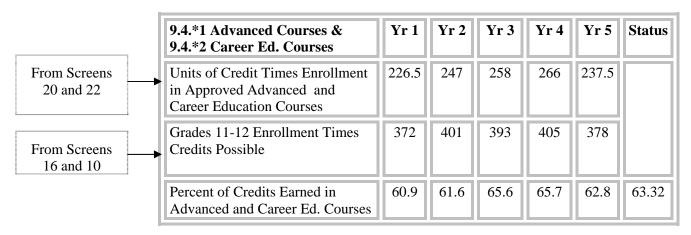

## Advanced and Career Education Courses Calculation (9.4.1 and 9.4.2)

Note: This calculation is used to determine if a district meets 9.4.1 and 9.4.2 using the "combined" method.

#### **Sources of data used in calculation:**

- October Cycle of Core Data, Screens 16, 20, and 22
- August Cycle of Core Data, Screen 10
- State-Approved Career Education Course List

#### **Example of supporting data format for APR:**

#### Method for calculating supporting data:

The percent of credits earned in advanced and career education courses combined is determined by dividing the units of credit times enrollment in approved advanced and career education courses by grades 11-12 enrollment times credit possible, then multiplying by 100. The following explains the step-by-step process and provides an example of how the calculations are performed.

EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA	EXAMPLES OF
	(using Yr 1 figures from above)	CALCULATIONS
1) Units of credit times enrollment in approved	a) Units of credit times	137 + 89.5 = 226.5
advanced and career education courses is calculated	enrollment in approved	
by adding the units of credit times enrollment in	advanced courses = 137	
approved advanced courses to the units of credit times	b) Units of credit times	
enrollment in approved career education courses. (For	enrollment in approved career	
further explanation, see Subsections D1 and D2.)	education courses = 89.5	
2) Grades 11-12 enrollment times credits possible is	September enrollment for	62 X 6 = 372
determined by using the sum of the enrollment in	grades 11 and $12 = 62$	
grades 11 and 12 (using September count), which is		
reported on Screen 16. This total enrollment number is	Periods per day = 6	
multiplied by the total number of periods per day, as		
reported on Screen 10. If the reported periods per day		
are less than 6, this indicates block scheduling. In this		
case, the enrollment is multiplied by total periods per		
day times 2.		

3) The percent of credits earned in advanced and	a) units of credit times	% of credits earned in
career education courses is determined by dividing	enrollment in advanced courses	advanced courses =
units of credit times enrollment in approved	= 226.5	
advanced and career education courses by grades	b) grades 11-12 enrollment	$226.5 \div 372 = .609$
11-12 enrollment times credits possible, then	times credits possible = 372	
multiplying by 100.	_	.609 X 100 = 60.9%
4) <b>Status</b> is determined by adding Yr1, Yr2, Yr3, Yr4,	a) Yr1 + Yr2 + Yr3 + Yr4 +	60.9 + 61.6 + 65.6 +
and Yr5 of the percent of credits earned in advanced	Yr 5 = 316.60	65.7 + 62.8 = 316.60
and career education courses and dividing by 5.		
		$316.60 \div 5 = 63.32\%$

## **College Placement Calculation (9.4.3)**

#### **Sources of data used in calculation:**

- February Cycle of Core Data, Screen 8
- June Cycle of Core Data, Screen 13

#### **Example of supporting data format for APR:**

	9.4.*3 College Placement	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
From Screen 8	Number of Graduates Entering College	69	72	79	83	93	
From Screen 13 (previous year)	Number of Graduates	126	133	128	141	143	
	Percent of Graduates Entering College	54.8	54.1	61.7	58.9	65.0	58.90

#### Method for calculating supporting data:

The percent of graduates entering college is determined by dividing the <u>number of graduates entering college</u> by the <u>number of graduates</u>, then multiplying by 100.

EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA (using Year 1 figures from above)		EXAMPLES OF CALCULATIONS
1) The number of graduates entering	,	Totals	
<b>college</b> is determined by using the sum of the previous year's graduates who entered 4-year	4-year college	43	12 16 10 60
college, 2-year college, or non-college credit	2-year college	16	43+16+10 = 69
postsecondary school (i.e., technical school), as reported on Screen 8.	non-college	10	
2) The <b>number of graduates</b> is reported on Screen 13 from the previous year of Core Data.	graduates = 1	126	
3) The percent of graduates entering	a) number of gradu		% of graduates entering
<b>college</b> is determined by dividing the	entering college = 0		college =
<b>number of graduates entering college</b> by	b) number of gradu	iates =	$69 \div 126 = .548$
the number of graduates, then multiplying	126		
by 100.			.548 X 100 = 54.8%
4) <b>Status</b> is determined by adding Yr1, Yr2,	a) $Yr1 + Yr2 + Yr3$	3 + Yr4 +	54.8 + 54.1 + 61.7 + 58.9 +
Yr3, Yr4, and Yr5 of the <b>percent of</b>	Yr 5 = 294.50		65.0 = 294.50
graduates entering college and dividing by			
5.			$294.50 \div 5 = 58.90\%$

## **Career Education Placement Calculation (9.4.4)**

#### **Sources of data used in calculation:**

• February Cycle of Core Data, Screens 26 and 27

#### **Example of supporting data format for APR:**

	9.4.*4 Career Ed. Placement	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
From Screens 26 and 27	Number of Graduates Completing a Career Education Program	41	36	38	42	44	
From Screens 26 and 27	Number of Graduates Completing a Career Education Program Placed in Occupations Relating to their Training, Attending College, or in the Military	33	24	27	32	33	
	Percent of Career Education Completers who are Placed	80.5	66.7	71.1	76.2	75.0	73.90

#### Method for calculating supporting data:

The percent of career education completers who are placed is determined by dividing the <u>number of graduates</u> completing a career education program placed in occupations relating to their training, attending college, or in the military by the number of graduates completing a career education program, then multiplying by 100.

EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) The <b>number of graduates</b>	SCREEN 26	SCREEN 26 =
completing a career education program is determined by adding the number of graduates reported on Screens 26 (for students reported by the comprehensive high school) and 27 (for students reported by the AVTS) in each of the following	Emp Rel = 5 Emp N-R = 3 Ced Rel = 0 Ced N-R = 6 Not Emp = 0 Nav Plc = 1 Sts Unk = 1 Mil Rel = 2 Mil N-R = 4 SCREEN 27 Emp Rel = 7 Emp N-R = 2 Ced Rel = 2 Ced N-R = 3 Not Emp = 1 Nav Plc = 0 Sts Unk = 0 Mil Rel = 3 Mil N-R = 1	5+3+0+6+0+1+1+2+4 = 22 SCREEN 27 = 7+2+2+3+1+0+0+3+1= 19
categories: EMP REL, EMP N-R, CED REL, CED N-R, NOT EMP, NAV PLC, STS UNK, MIL REL, and MIL N-R.	Sts Olik = 0 Will Ref = 3 Will IV-R = 1	TOTAL = 22+19=41
2) The number of graduates	SCREEN 26	SCREEN 26 =
completing a career education program placed in occupations relating to their training, attending college, or in the military is	Emp Rel = 5 Ced Rel = 0 Ced N-R = 6 Mil Rel = 2 Mil N-R = 4	5+0+6+2+4 = 17
determined by adding the number of	SCREEN 27	SCREEN 27 =
graduates reported on Screens 26 and 27 in the following categories: EMP REL, CED REL, CED N-R, MIL	Emp Rel = 7 Ced Rel = 2 Ced N-R = 3 Mil Rel = 3 Mil N-R = 1	7+2+3+3+1 = 16 TOTAL = $17+16 = 33$
REL, MIL N-R.		

3) The percent of career education completers who are placed is	a) number of graduates completing a career education program = 41	percent of career education completers
determined by dividing the <b>number</b>	b) number of graduates completing a	who are placed =
of graduates completing a career	career education program placed in	1
education program placed in	occupations relating to their training,	$33 \div 41 = .805$
occupations relating to their	attending college, or in the military =33	
training, attending college, or in		
the military by the number of		.805 X 100 = 80.5%
graduates completing a career		
education program, then		
multiplying by 100.		
4) <b>Status</b> is determined by adding	a) $Yr1 + Yr2 + Yr3 + Yr4$	80.5 + 66.7 + 71.1 +
Yr1, Yr2, Yr3, Yr4, and Yr5 of the	+ Yr 5 = 369.50	76.2 + 75.0 = 369.50
percent of career education		
completers who are placed and		$369.50 \div 5 = 73.90\%$
dividing by 5.		

### **Career Education Placement/Follow-Up Guidelines**

Follow-up data is reported on the previous year's graduates based on the status of the graduates 180 days following their exit from career education training. *Each graduate should be reported in only one career education program area.* Districts should collect follow-up information on any student who graduated high school and received credit in at least one state-approved career education course (excluding Exploring Agriculture, Industrial Technology, and any FACS course) during grades 9-12. However, if students completed state-approved career courses at the comprehensive high school and the area career education school, their follow-up data should <u>not</u> be reported for both locations. Generally, the area career education school is responsible for completing the follow-up data on screen 27 and providing the sending school with a copy.

If the graduate is employed and continuing education, use the following guidelines:

- A graduate attending school (full- or part-time) <u>and</u> employed (full or part-time) in a field for which they were trained, should be reported as "employed related" (EMP REL).
- A graduate attending school (full- or part-time) in a field for which they were trained, but not employed in a field for which they were trained should be reported as "continuing education related" (CED REL).
- A graduate attending school (full- or part-time) in a field for which they were <u>not</u> trained, but employed (full or part-time) in a field for which they were trained should be reported as "employed related" (EMP REL).

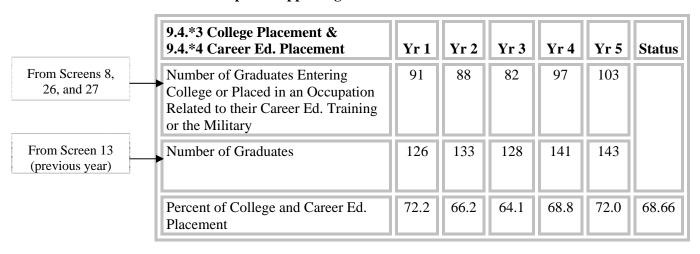

## College and Career Education Placement Calculation (9.4.3 and 9.4.4 Combined)

Note: This calculation is used to determine if a district meets 9.4.3 and 9.4.4 using the "combined" method.

#### Sources of data used in calculation:

- February Cycle of Core Data, Screens 8, 26, and 27
- June Cycle of Core Data, Screen 13

#### **Example of supporting data format for APR:**

#### Method for calculating supporting data:

The percent of graduates entering college or in career education placement is determined by dividing the <u>number of graduates entering college or placed in an occupation related to their career education training or the military by the number of graduates, then multiplying by 100.</u>

by the <u>number of graduates</u> , then multiplying o	y 100.	
EXPLANATION OF CALCULATIONS	EXAMPLES OF DATA	EXAMPLES OF
	(using Year 1 figures from above)	CALCULATIONS
1) The number of graduates entering	SCREEN 8	SCREEN 8
college or placed in an occupation related	4-year college = 43	
to their career education training or the	2-year college = 16	43+16+10 = 69
<b>military</b> is determined by using the sum of	non-college =10	
the previous year's graduates reported on	SCREEN 26	SCREEN 26
Screen 8 who entered 4-year college, 2-year	Emp Rel =5 Mil Rel = 2	5+2+4 = 11
college, or non-college credit postsecondary	Mil N-R = 4	
school (i.e., technical school) and adding this	SCREEN 27	SCREEN 27
to the number of the previous year's	Emp Rel =7 Mil Rel = 3	7+3+1 = 11
graduates reported in one of the following	Mil N-R = 1	TOTAL
categories on Screens 26 and 27: EMP REL,		69+11+11 = 91
MIL REL, and MIL NR.		09+11+11 = 91
2) The <b>number of graduates</b> is reported on	graduates = 126	
Screen 13 from the previous year's Core		
Data.		

3) The percent of college and career	a) number of graduates entering	% of graduates entering
<b>education placement</b> is determined by	college or placed in an occupation	college =
dividing the number of graduates entering	related to their career education	
college or placed in an occupation related	training or the military = 91	$91 \div 126 = .722$
to their career education training or the	b) number of graduates = 126	
military by the number of graduates, then		$.722 \times 100 = 72.2\%$
multiplying by 100.		
4) <b>Status</b> is determined by adding Yr1, Yr2,	a) Yr1 + Yr2 + Yr3+ Yr4	72.2 + 66.2 + 64.1 +
Yr3, Yr4, and Yr5 of the <b>percent of college</b>	+ Yr 5 = 343.30	68.8 + 72.0 = 343.30
and career education placement and		
dividing by 5.		$343.30 \div 5 = 68.66\%$

## Standard 9.5 Graduation Rate Calculation (9.5)

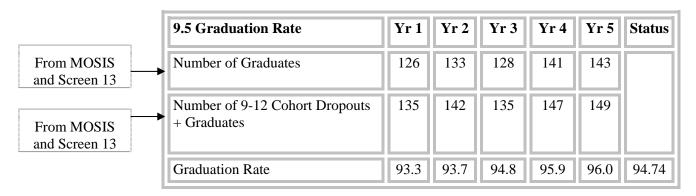

#### Sources of data used in calculation:

- June Cycle of Core Data, Screen 13 (2004-2008)
  - Includes aggregated student-level data from MOSIS June Cycle certified files

#### **NOTES:**

- Dropouts reported as the result of an expulsion due to a violent act according to Section 160.261 and 167.171, RSMo. will be excluded from the total number of dropouts used for MSIP purposes. The number of 9-12 grade students reported as expelled on Screen 9 of Core Data will be subtracted from the total number of 9-12 dropouts reported on Screen 13 of Core Data.
- In the year a district is being considered for classification under the Missouri School Improvement Program, the district *may* not meet the Graduation Rate Standard (9.5) if the district has not consistently reported students who drop out of school to the Missouri Literacy Hotline, as required by Standard 8.7.3.
- In the year a district is being considered for classification under the Missouri School Improvement Program, the district may appeal to earn credit for dropouts who completed their GED within 5 years of dropping out of school (see explanation and example on next page). Districts may also appeal to disaggregate those students who are included in the dropout count more than one time.

#### **Example of supporting data format for APR:**

#### Method for calculating supporting data:

The persistence to a graduation rate is determined by dividing the <u>number of graduates</u> by 100.

EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS
1) The <b>number of graduates</b> is	number of graduates = 126	
reported on Screen 13.		
2) The number of 9-12 cohort	number of graduates = 126	
<b>dropouts</b> + <b>graduates</b> is determined		
by adding the <b>number of graduates</b>	Cohort dropouts:	126 + 9 = 135
reported on Screen 13 and the <b>number</b>	Grade $12-2005 = 2$	
of cohort dropouts reported on Screen	Grade $11-2004 = 2$	
13.	Grade $10-2003 = 2$	
	Grade $09-2002 = 3$	
	Total Cohort dropouts: 9	

Missouri Dept. of Elementary & Secondary Education Understanding Your APR

2008 4<sup>th</sup> Cycle APR
DESE 3341-19 9/03

3) The persistence to graduation rate	a) number of graduates = 126	
is determined by dividing the <b>number</b>	b) number of 9-12 cohort dropouts +	$126 \div 135 = .933$
of graduates by the number of 9-12	graduates = 135	
cohort dropouts + graduates		$.933 \times 100 = 93.3\%$
4) <b>Status</b> is determined by adding Yr1,	a) Yr1 + Yr2 + Yr3+ Yr4	93.3 + 93.7 + 94.8 +
Yr2, Yr3, Yr4, and Yr5 of the	+ Yr 5 = 473.70	95.9 + 96.0 = 473.70
persistence to graduation rate and		
dividing by 5.		$473.70 \div 5 = 94.74\%$

#### **GED Bonus Points Calculation**

In the year a district's classification is being considered under the Missouri School Improvement Program, the district may earn one progress bonus point if in at least three of the past five years at least 5% of the district's five-year average number of seniors earned a GED within 5 years of dropping out of school. The following step-by-step example illustrates the GED bonus point calculation. The number of dropouts reported on Core Data is compared with the number of dropouts reported by the district to the Adult Literacy Hotline. Districts must have consistently reported their dropouts to the Adult Literacy Hotline in order for this bonus provision to be considered.

Example:

# of seniors (as reported in the September count on	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5
Core Data screen 16)	38	46	42	46	39
# of GED completers (only those who complete the					
GED within five years of their drop-out date are	0	2	3	2	1
counted in the bonus points calculation)					

STEP 1 – Average the number of seniors from the past five years.

$$\frac{38+46+42+46+39}{5} = 42$$

> <u>STEP 2</u> – Multiply the five-year average by .05 (rounding to the nearest whole number). This product is 5% of the average number of seniors.

$$.05 \times 42 = 2$$

➤ <u>STEP 3</u> – Compare the product of the calculation in step 2 with the annual number of dropouts who completed a GED within five years of their drop-out date. The district earns one progress bonus point if in at least three out of five years the number of GED completers equals or exceeds 5% of the average number of seniors.

In this example, 5% of the average number of seniors is two. The district earns one progress bonus point because the number of GED completers equals or exceeds two in Years 2, 3, and 4.

## Standard 9.6 Attendance Calculation

#### Sources of data used in calculation:

- June Cycle of Core Data, Screens 10 and 14 (2004-2008)
  - Includes aggregated student-level data from MOSIS June Cycle certified files
- February Cycle of Core Data, Screen 16

#### **Example of supporting data format for APR:**

9.6 Average Daily Attendance	Yr 1	Yr 2	Yr 3	Yr 4	Yr 5	Status
Grades K-8	94.3	94.2	94.3	94.4	94.6	
Grades 9-12	90.8	91.8	90.5	91.1	92.4	
Grades K-12	93.1	93.5	93.1	93.4	93.9	93.40

#### Method for calculating supporting data:

If five years of hours-of-absence data are available for all grade levels, the average daily attendance for each grade span is determined by using the "hours of absence" method. This method is calculated by dividing the hours of attendance by the hours possible, then multiplying by 100.

If five years of hours-of-absence data are not available at all grade levels, the "**January membership**" method is used. This method is calculated by dividing the <u>average daily attendance</u> by the <u>reported January membership count</u>, then multiplying by 100.

HOURS OF ABSENCE METHOD										
EXPLANATION OF	EXAMPLES OF DATA	EXAMPLES OF								
CALCULATIONS	(using Year 1 figures from above)	CALCULATIONS								
1) The <b>hours of attendance</b> is	ATTENDANCE HOURS	163,298+40,113+0+0 = 203,411

## Standard 10.1 Post-Elementary School GPA Calculation (K-8 Districts Only)

#### Sources of data used in calculation:

- June Cycle of Core Data, Screen 14B (2004-2008)
  - Includes aggregated student-level data from MOSIS June Cycle certified files

#### **Example of supporting data format for APR:**

#### Method for calculating supporting data:

The <u>GPA of grades 9 and 10 elementary students</u> is determined by finding the average GPA (using a 4-point scale) of resident II (tuition) students who graduated from a K-8 district and are in either grade 9 or 10 at the receiving school.

The <u>GPA of grades 9 and 10 receiving high school students</u> is determined by finding the average GPA (using a 4-point scale) for students in grades 9 and 10 who are not resident II students.

EXPLANATION OF CALCULATIONS	EXAMPL (using Year			EXAMPLES OF CALCULATIONS		
1) The <b>GPA of grades 9 and 10 elementary students</b> is calculated using the GPA (rounded	K-8 g	graduat		11-pt	Calculation	4-pt
to the nearest thousandth) reported on Screen	<u>District</u> C		Students	7.34 4.513	$(7.34+1) \div 3$ $(4.513+1) \div 3$	2.78 1.838
14B for ninth- and tenth-grade resident II students who graduated from a K-8 district. If		7.34 4.513	5 2	6.428 4.895	$(6.428+1) \div 3$ $(4.895+1) \div 3$	2.476 1.965
GPAs are reported on an 11-point scale, they must be converted to a 4-point scale before	GR	ADE 10	<u>0</u>	Calcula	ted GPA X 5 = 13.9	
performing the calculations. The formula for this conversion is $(GPA + 1) \div 3$ . To		<u>GPA</u> 6.428	Students 2	1.838	$3 \times 2 = 3.676$	
determine the overall average of the K-8 graduate GPAs, first the GPA for grade 9 is	Dist.#2	4.895	2		$6 \times 2 = 4.952$ $\times 2 = 3.93$	
multiplied by the number of students in grade 9. Next, the GPA for grade 10 is multiplied				Total #		
by the number of students in grade 10. These				10tal #	<b>K-8 graduates</b> 5+2+2+2 = 11	
steps are repeated for all districts attended by the K-8 graduates. The products are then				Final C	alculated GPA	
summed and divided by the total number of K-8 graduates in grades 9 and 10.				26	$.458 \div 11 = 2.40$	05

2) The GPA of grades 9 and 10 elementary	<b>Receiving District Students</b>	11-pt Calculation 4-pt
students is calculated using the GPA (rounded	GRADE 9	7.574 (7.574+1) ÷ 3 2.858
to the nearest thousandth) reported on Screen	District GPA Students	(**** / -
14B for ninth- and tenth-grade receiving-	Dist.#1 7.574 615	(6.126+1) + 6
district students (GPAs reported on an 11-	Dist.#2 6.158 263	7.667 $(7.667+1) \div 3$ 2.889
point scale are converted to a 4-point scale).	Dist.π2 0.136 203	$6.475  (6.475+1) \div 3  2.492$
To determine the overall average of the	GRADE 10	Calculated GPA
receiving-district student GPAs, first the GPA	District GPA Students	2.858 X 615 = 1757.67
for grade 9 is multiplied by the number of	Dist.#1 7.667 589	2.386 X 263 = 627.518
students in grade 9. Next, the GPA for grade	Dist.#2 6.475 206	2.889 X 589 = 1701.621
10 is multiplied by the number of students in	Dist.#2 0.475 200	2.492 X 206 = 513.352
grade 10. These steps are repeated for all		Total = 4600.161
receiving districts. The products are then		<b>Total # Receiving Dist. Students</b>
summed and divided by the total number of		615+263+589+206 = 1673
receiving-district students in grades 9 and 10.		Final Calculated GPA
		4600.161 ÷ 1673 = 2.75
3) The 5 Yr Avg of the GPA of grades 9 and	a) 5 Yr Avg of the GPA of	GPA of grades 9 and 10
<b>10 elementary students</b> is determined by	grades 9 and 10 elementary	elementary students:
adding Yr1, Yr2, Yr3, Yr4, and Yr5 and	students $Yr1 + Yr2 + Yr3+$	2.405 + 2.557 + 2.613 + 2.79 +
dividing by 5. The <b>5 Yr Avg</b> of the <b>GPA of</b>	Yr4 + Yr5 = 13.099	2.734 = 13.099
Grades 9 and 10 Receiving High School	b) 5 Yr Avg of the GPA of	$13.099 \div 5 = $ <b>2.620</b>
<b>Students</b> is determined by adding Yr1, Yr2,	Grades 9 and 10 Receiving	GPA of grades 9 and 10
Yr3, Yr4, and Yr5 and dividing by 5.	High School Students Yr1 +	receiving high school students:
	Yr2 + Yr3 + Yr4 + Yr5 =	2.75 + 2.912 + 2.881 + 2.889 +
	14.157	2.725 = 14.157
		$14.157 \div 5 = 2.831$
4) <b>Status</b> is determined by subtracting the 5	a) GPA of grades 9 and 10	
year average of the GPA of Grades 9 and 10	elementary students = $2.620$	Elem. Rec HS
Elementary Students from the 5 year	b) GPA of grades 9 and 10	2.620 - 2.831 = -0.211
average of the GPA of Grades 9 and 10	receiving high school	
Receiving High School Students.	students = 2.831

# **Procedures for Making Corrections**

Districts have the opportunity throughout the year to make current and prior year corrections to performance data reported in the Core Data Collection System. For 2008 June Cycle data, updates should be made to the student level data through the MOSIS data collection system. Each year, when the preliminary APRs are generated, districts are notified of the data correction window. Changes made after the data correction window ends are not reflected in Final Annual Performance Reports. Districts being considered for classification by the State Board of Education undergo an internal data review before data are presented to the State Board of Education. The data review identifies potential errors in data, inconsistent data trends, and areas in which the district may need to provide detailed supporting data. Districts must use consistent data collection/reporting methodology for all performance standards. Therefore, when a change in methodology occurs, the district must apply the same methodology to all five years of data being analyzed. When districts identify errors in data not available via the Core Data Collection System, the district must demonstrate that all five years of data have been analyzed for accuracy. Please contact the Accountability Data and Accreditation Section at (573) 526-4886 for more information on making historical data corrections.

## **NOTES**

### General

For K-12 districts, 14 fourteen performance standards are measured on the 2008 APR. Districts may meet the additional Bonus Achievement Standard as long as the total number of standards met does not exceed 14. For K-8 Districts, 7 seven performance standards are measured on the 2008 APR. Districts may meet the additional Bonus Achievement Standard as long as the total number of standards met does not exceed 7.

#### **Bonus MAP Achievement Standard**

- Bonus standard "met" applies to any "not met" standard
- Districts may not exceed 14 total standards met
- Criteria: If any improvement is shown in the MPI from 2007 to 2008 in a majority of the MAP standards (4 out of 6, for K-12 districts and 3 out of 4, for K-8 districts) the Bonus MAP Achievement Standard is met. See the Bonus MAP Achievement Standard on Page 9

Status and Progress measures are applied to performance standards.

#### **Gap Bonus Points**

- For each MAP standard, districts have the opportunity to earn Gap Bonus Points toward meeting the MAP Standard. The Gap Bonus Points allow for another opportunity for districts to meet each MAP standard.
  - 1. 40 Status Points = Met
  - 2. 50 Status + Progress Points = Met
  - 3. 40 Status + Progress Points + Gap Bonus = Met
- Districts have the opportunity to earn bonus credit toward meeting a MAP standard, using either a comparison of the MAP improvement of their minority population or their free- and reduced-price lunch population with the state majority. If either of the following conditions is considered "Met", the district may meet the MAP standard IF the district has earned at least 40 Status + Progress points.
  - 1. The MAP scores of minority groups that include 20 or more students are aggregated to create an MPI for the minority population. The MAP improvement of the district's minority population from 2007 to 2008 is compared with that of the improvement of the state majority from 2007 to 2008. The bonus provision is considered "Met" if the improvement of the district's minority population is greater than the improvement of the state majority. The Gap Bonus "Met" does not mean the MAP standard is "Met". The district still hast to earn at least 40 Status + Progress points in order to meet the MAP standard.
  - 2. If the district's free and-reduced lunch population includes 20 or more students, the MPI improvement of those students from 2007 to 2008 is compared with the improvement of the state non-free and reduced-price lunch population. The bonus provision is considered "Met" if the improvement of the district's free and reduced-price lunch population is greater than the improvement of the state non-free and reduced-price lunch population. The Gap Bonus "Met" does not mean the MAP standard is "Met". The district still has to earn at least 40 Status + Progress points in order to meet the MAP standard.

#### **Changes for 2008**

#### **Science and Social Studies**

- Points for Social Studies will no longer be awarded in 2008
- A Bonus point for 2008 Science data may be awarded. See the Scoring Guide section to see how a district can earn a science bonus met.

#### **Career Education Courses**

For 2007 and 2008, Project Lead the Way and Personal Finance courses are now included if the course is listed on the school district's approved Career Education course list.

#### **Performance Worksheets**

Updated Performance Worksheets are available on-line at: http://dese.mo.gov/divimprove/sia/dar/.

#### **Procedures for Making Corrections**

Please see the section in the document titled "Procedures for Making Corrections" on page 47

## **Performance Accreditation Levels**

Accreditation levels and review types are as follows:

\*A district must meet at least one MAP standard to be provisionally accredited.

#### Accreditation

Status	Aco	credited	<b>Provisional</b>	Unaccredited	
<b>Review Status</b>	Mini Review Targeted Review Full Waiver Limited Waiver		<b>Full Review</b>	Full Review	
K-12 Districts	12+ Met	9-11 Met	6-8 Met	1-5 Met	
K-8 Districts	6+ Met	5 Met	4 Met	1-3 Met	

Note: Bonus points may not be considered in the total met when determining the review type of the district.

Accreditation levels may change as more data becomes available.

#### **Distinction in Performance**

K-12 School Districts must meet at least thirteen out of fourteen performance standards, including all six MAP standards (9.1\*1-9.1\*6). The Bonus MAP Achievement Standard will be considered in place of a MAP or non-MAP performance standard that is "not met". Gap Bonus Points and Subject Area Bonus Points will **not** be considered for Distinction in Performance.

K-8 School Districts must meet at least six out of seven performance standards, including all four MAP standards (9.1\*1-9.1\*4). The Bonus MAP Achievement Standard will be considered in place of a MAP or non-MAP performance standard that is "not met". Gap Bonus Points and Subject Area Bonus Points will **not** be considered for Distinction in Performance.

#### **End-of-Course Assessments**

- Phase II field tests begin in 2008-2009.
- 2008-2009 is the mandatory testing year for Algebra I, English II, and Biology. These courses will be incorporated into the APR and AYP. For APR purposes, Algebra I will replace the current high school MAP standard and English II will replace the current high school Communication Arts standard. Data for students in any grade taking the EOCs will be included in the district-level APR. We will provide you with a transition plan for phasing out the high school MAP assessments. Biology will be part of the Science Bonus standard throughout 4<sup>th</sup> cycle and will become an MSIP standard in 5<sup>th</sup> cycle. For AYP purposes, we are waiting approval from the United States Education Department (USED). We will provide additional information as it becomes available.
- 2009-2010, Algebra II, Integrated Mathematics II and III, Geometry, English I, Government, and American History will be added.
- Students taking Algebra I in the 8<sup>th</sup> grade will take BOTH the MAP and Algebra I end-of-course exams.
